

Promoting academia-industry alliances
for R&D through collaborative and
open innovation platform - ALL4R&D

Co-funded by the
Erasmus+ Programme
of the European Union

ALL4R&D

collaborate with Universities and Companies

When companies and universities work in tandem they can push the frontiers of knowledge, and become a powerful engine for innovation and economic growth. The ALL4R&D is oriented towards bridging university and industry and overcoming challenges. ALL4R&D creates university-industry collaborations and facilitates university-industry research, education and innovation projects.

The academia-industry collaboration has effect, positive influence, and significant impact on personal, organizational and societal level.

- Effects and benefits for academia: publications, new researchers, more funds available, exploring innovative topics;
- Effects and benefits for companies: commercialisation, applicable and practical solutions relevant for every day operations, introducing new services or products to the market, knowledge for the employees on latest technologies, competitiveness; and
- Effects and benefits for society: positive effects from the results, local and regional development, effects on health, quality of life, increased safety, new job openings.
